

## User Flow:

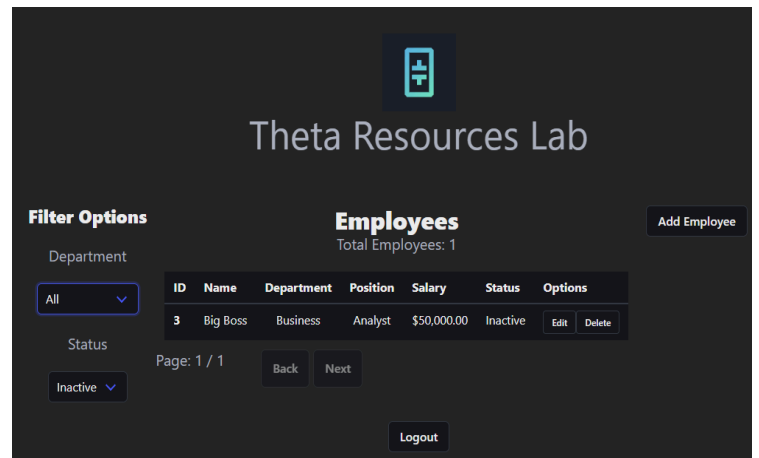

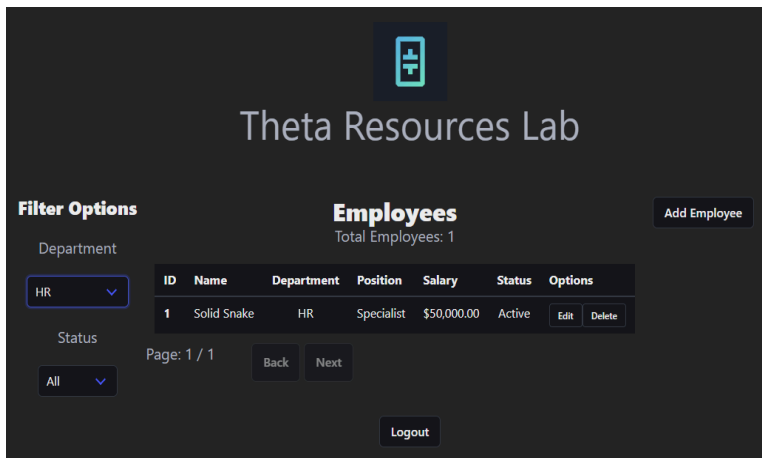

- First the User is greeted with a dummy login page

- When the User clicks “Manage Employees”, this is when the client starts to make requests to the backend server

- The Landing Page includes a view of the Employees, Total Employee count, and Pagination.
- Ability to Filter the Employees by Department & Status and Add an Employee are also included.

- When the “HR” Department filter is selected, only Users from that Department Appear, same for “Inactive” Status filter.
